DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-61, drawn to a system, method and medium for managing communication between processes which includes the feature communications engine, classified in class 711, subclass 154 [Storage Accessing and Control - Control technique].
 - II. Claims 62-66, drawn to a transmissible data message generated according to a method which includes the features assigning memory blocks to a plurality of processes and accessing data in correspondingly assigned memory blocks, classified in class 711, subclass 151 [Storage Accessing and Control - Prioritized access regulation].

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the management of communication between processors utilizing the communications engine does not require assignment of memory blocks. The subcombination has separate utility such as a method of accessing data residing in assigned memory blocks which does not require a communications engine.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
